

TA 125 kHz Cylindrical Antennas M18 & M30

Product description:

- This RFID system is for professional users, offering a perfect solution for all applications where reliable, robust and well performing products are needed.
- The 125 kHz cylindrical antennas are designed for industrial applications.
- The reading distance can be up to 13 cm (depending on tag type).

| <u>Technical specification</u> | |
|--------------------------------|--|
| Description: | Cylindrical antennas M18 and M30 |
| Dimensions: | - M18 x 90 mm - M30 x 78 mm |
| Frequency: | 125 kHz |
| Material: | ABS |
| Cable length: | 1,5 m |
| Impedance: | 50 ohm |
| Interface: | Coaxial BNC Connector |
| Operating distance: | Up to 13 cm (depending on tag type) |
| Temperature: | -10°C up to +60°C |
| Humidity resistance: | IP 65 |
| Order number: | E4002.000111 – M30 x78mm, Reading distance up to 13cm |
| | E4002.000113 – M18 x90mm, Reading distance up to 10cm |
